

Self-Assessment · Workplace & Career Implications

ENTJ-T · Turbulent Commander · Anjali Gupta 21f2000306 · IIT Madras — SPG

WHO I AM AT WORK

My career is more than a job, it is a platform to exercise leadership and create impact. As an **ENTJ-T**, I am drawn to roles that involve strategy, high-stakes decisions, and guiding teams toward a shared goal. Whether building something from scratch or driving results within a structure, I always aim to leave things better than I found them.

Strategic Thinker

Big-picture first; connects dots across complexity

Decisive Communicator

Direct, clear, and persuasive in all settings

Achievement-Driven

High expectations — for myself and for the work

CAREER STRENGTHS

Natural Leadership

I step into leadership roles instinctively — organizing people, setting direction, and holding teams accountable.

Strategic Decision-Making

My ability to see the bigger picture helps me navigate ambiguity, prioritize smartly, and drive high-impact outcomes.

Influential Communication

3+ years of teaching sharpened my ability to simplify complex ideas and move people with clarity and confidence.

Challenges, Growth & Career Direction

ENTJ-T · Turbulent Commander · Anjali Gupta 21f2000306 · IIT Madras — SPG

PROFESSIONAL CHALLENGES

Detail Oversight

Big-picture focus can cause me to miss finer details or grow impatient with operational tasks.

→ I actively use structured checklists and pair with detail-oriented team members to fill this gap.

Delegation & Trust

High standards make delegation difficult — I tend to want to oversee everything personally.

→ I am practising assigning ownership to others and stepping back, recognising that trust builds stronger teams.

Communication Tone

My directness can come across as blunt or demanding, straining relationships in some settings.

→ I am learning to lead with empathy first — framing feedback as collaborative rather than corrective.

CAREER DIRECTION

Data Analyst

Translating data into decisions — clear, structured, impactful

Data Scientist

Building models that power strategy at scale

Analytics Lead

Leading data teams toward org-wide business outcomes

My Reflection

The ENTJ-T profile is not just an assessment — it mirrors how I have always operated. My Engineering-to-DataScience transition, my years in teaching, and my drive to upskill all reflect the same core: lead with purpose, grow with self-awareness.
